Do you have any other praise, criticisms or suggestions for further improvement for our CPD session?

- Flip learning - Things to look and where to find it a week before the session
- Nice to have time to see other approaches/techniques that could be used in the classroom.
- I have enjoyed the sessions looking at and questioning my own and others practice. I sometimes feel overwhelmed by the continual need to do something new. I want, feel the need to consolidate a new technique, approach and be comfortable that I understand the possibilities before moving on to the next initiative.
- Enjoyed it - can we carry on?
- I felt rather overloaded with techniques and would rather have covered fewer techniques with time to discuss using them with others. As we were all LBACC teachers I would have liked to discuss using the techniques in particular spots in challenges. I really, really enjoyed the individual stuff and also the literacy, that was very useful when going over long answer questions in my subject area.
- Teachers discussing the use of these techniques was useful. It's good to see how people can use the various techniques in real classroom situation. It would be good to have more of this.

Cheers for the input.

- Has changed the way I think about my teaching and the learning of pupils.
- Helpful learning other techniques and also hear how it has been implemented.
-
- Supply biscuits !

On a serious note, this needs to continue, I really value the group discussion and sharing practice I'm a quite informal manner.

- I have really enjoyed finding out the different pedagogies and having a go at them. I have explored some of them further through Twitter and on the internet. I will continue to try using them in the classroom.
-
- Felt that it was good to get a chance to explore different styles/ideas for teaching and gather view points from other members of staff.
-

- Have time to reflect and discuss issues in the following week.
